## Face & Cie by Zenka : An innovative and fun concept of frames with interchangeable fronts.

*Like nature, which adopts a new look each season, we all evolve and reinvent ourselves as our desires and lives change. This is why Zenka has designed interchangeable eyewear that can be transformed to suit our mood and lifestyle.*

### Change of decor

The principle is simple and ingenious : an original and colourful clip-on part is added to the top or front of a simple frame, transforming it in just one click into trendy, eye-catching and unique glasses. These decorative elements are as easy to remove as they are to attach.

### For each new season, a new look

To allow glasses wearers to find the perfect match according to their mood of the moment, Zenka offers a wide range of frames and a multitude of clips with new designs each season.

Whether glamorous, contemporary, daring, trendy or ultra-stylish, our clips reflect the latest fashion trends.

### High-quality products

Frames are made from TNG and inox, high-tech, robust and ultra-light materials.

100% French manufacturing adds a guarantee of quality.

This concept is only available from approved Face & Cie opticians
